

Peroni Pompe S.p.A. for the Oleochemical Industry

The Company

Established in **1895**, **Peroni Pompe** is a globally leading manufacturer of **Reciprocating Process Pumps**.

Peroni plunger pumps are world famous for their **reliability in heavy duty, 24/7, high pressure applications**.

As a matter of fact, Peroni's pumps are commonly used in critical applications of **oleochemicals, petrochemicals and oil & gas industries**.

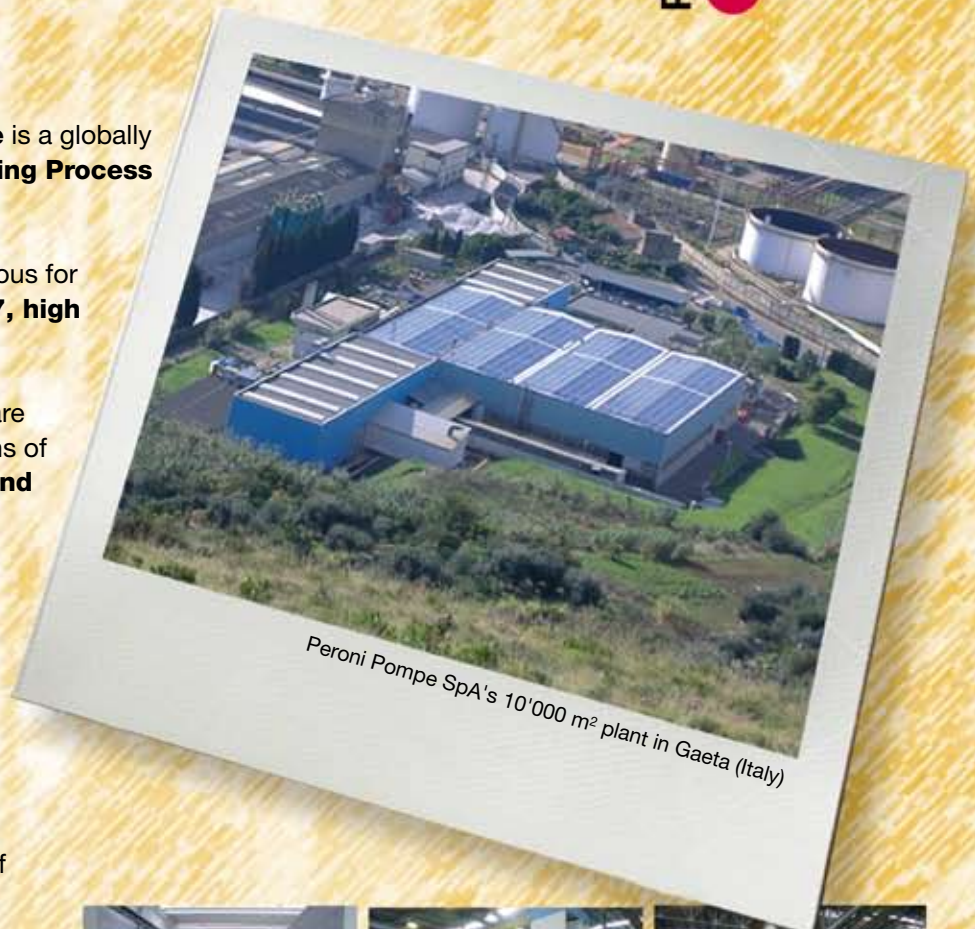

Peroni is a process and engineering **application specialist** able to develop fully packaged and customized solutions, with deep knowledge of pulsation issues.

Pump Range

To meet the stringent requirements of process applications, Peroni manufactures a complete range of **triplex, quintuplex and septuplex reciprocating pumps**, from 2 kW to 3'000 kW.

All Peroni pumps are manufactured under a rigorous, proven quality assurance system certified to UNI EN **ISO 9001** quality standards.

Peroni is also certified according to **ISO 14001** and **ISO 45001**.

Peroni Pompe Applications in Oleochemical Industry

Reciprocating pumps are commonly used in the Oleochemicals industry to produce **fatty acids** (crude oil and process water feed) and **fatty alcohols** (hydrogenation feed), typically based on crude vegetable oils.

Peroni **has a long history supplying pumps for oleochemicals**, with projects executed for the most demanding engineering and end user firms worldwide.

In order to **promptly address customer requests**, Peroni Pompe's sales offices and authorized service centers are located around the globe, including **Singapore and Malaysia**.

Fatty alcohol production – Indonesia
Pump model: PTO 190
Fluid: Fatty alcohol + catalyst
Capacity: 64 m³/h
Pressure: 250 bar
Temperature: 220 °C

Fatty acid production – Saudi Arabia
Pump model: Titano 3130N
Fluid: Crude oil / Process water
Capacity: 16 m³/h
Pressure: 60 bar
Temperature: 110 °C
